

The Final Fat Burner Program

Jan. 6 – Feb 16

Get Ready for the New 2011 Body!!!

Frustrated with stubborn belly fat?

Has menopause stalled your weight loss?

Is your health at risk from increased weight?

Have you given up on weight loss programs?

Been diagnosed w/ diabetes, high blood pressure/cholesterol/triglycerides?

**Are you depressed at how your weight has been steadily creeping up
no matter what you do or eat?**

If there's 1 thing I hear women COMPLAIN about over & over again, it's their complete frustration with excess rolls of FAT around the belly, hips, love handles & buttocks.

Men tend to accumulate fat in their middle. Wherever the fat accumulates, the bottom line is: Not only is it a HUGE struggle to how we look, but this extra fat dramatically effects how our bodies function & our emotional wellbeing.

Excess FAT poses a threat for every chronic disease & health problems such as cardio-vascular disease, cancer, diabetes, auto-immune, Alzheimer's, allergies, infertility, joint deterioration, depression, on & on. It is also the cause of premature aging.

Everyone is trying to address the overweight obesity epidemic with the usual ways: eating healthy, exercise & portion control. They are NOT working. The odds of gaining the weight back are very high. 95% of people gain it back.

60 years ago a brilliant English Endocrinologist Dr. A.T. W. Simeons discovered the underlying cause of obesity was due to compromised functioning of the key fat burning control center of the body located in the hypothalamus gland in the middle of our brain.

Our modern ways of living have impaired the ability of the hypothalamus to regulate the critical fat burning mechanism of the body & its many other functions: i.e., endocrine balance along with the regulation of cravings, sleep, moods & energy.

Dr. Simeons found the key to resetting the hypothalamus. The result was, not just losing all that misshapen stored fat, but actually the rebooting of the metabolic system.

This is critical because we function optimally when we are burning fat.

**So I decided to give it a try.
To my amazement I was losing between ½ - 1 lb. a day!
This was just what Dr.Simeons' promised would happen.**

Each morning I'd step on the scale & I could NOT believe what seeing.
3 weeks later I'd lost 15 lbs. & 2 dress sizes.
All the while I was feeling high energy, no hunger, no muscle loss & no saggy skin!

Trust me, I was really skeptical. As a body purest, I don't like taking anything that alters my natural chemistry. And it didn't. I feel great!

This has literally catapulted me into a new level of health & rejuvenation!
Now I charge up hills feeling 10 years younger.
In my Yoga practice I feel stronger, more flexible without that nasty belly bulge in my way of postures!

I truly believe HCG is the best solution presently available for BURNING FAT & healing the underlying issues with metabolic imbalances. But here's the catch.

You MUST follow Dr. Simeon's protocol exactly. No cheating. Or it won't work.
Whenever I share this Amazing Final Fat-Burner Secret ... clients & friends have asked me to guide them.

6-Week Final Fat Burner Program

Cost: \$375 Special 1-Time Only Discount Price until 12/25
If you & a friend sign-up together, you get the 2nd program for ½ price!
